

# ENVIRONMENTAL LITERACY

Supporting Students as Both Learners and Stewards

**DECEMBER 9, 2021 3:30 - 5:00 PM ET**

register [here](#)

*Environmental literacy programming connects students to their communities and the environment around them. With environmental literacy programming, students and educators work to apply earth system science, civics, and interdisciplinary learning to understand and address complex local and global environmental challenges. Join the U.S. Department of Education and the National Oceanic and Atmospheric Administration (NOAA) to explore how Federal, state, and local partners are engaged in environmental literacy programming and to learn about resources that can support environmental literacy programming in your area.*

**Moderator:** [Patti Curtis](#), Robert Noyce/Ellen Lettvin STEM Education Fellow, Office of Elementary and Secondary Education, U.S. Department of Education

**Speakers:**

Andrea Falken, [U.S. Department of Education Green Ribbon Schools](#)

Sarah Schoedinger, [NOAA Environmental Literacy Program](#)

Bronwen Rice, [NOAA Bay Watershed Education and Training Program](#)

Frank Niepold - [NOAA Climate Program Office](#)

  
STEM Webinar

**What is Environmental Literacy?**

**What are U.S. Department of Education Green Ribbon Schools?**

**How can you and why should you integrate environmental literacy into your educational setting?**

**What resources are available to support environmental literacy programming?**

A closed-captioned recording will be available 48 hours after the event. If you require other accommodations to participate in this event, email [Patti.Curtis@ed.gov](mailto:Patti.Curtis@ed.gov) or call 202.453.6768 by November 30, 2021.

*Any content or opinions shared during this webinar are not that of the U.S. Department of Education nor an endorsement of any persons, products, programs, or policies mentioned therein.*
