

INSPIRED BY NATURE: Enhancing STEM with Biomimicry Design Challenges

BIOMIMICRY
YOUTH DESIGN
CHALLENGE

FREE 5-hour Professional Development

Join us to explore how nature-inspired design can support rich, project-based STEM learning experiences in your classroom.

This workshop for middle and high school teachers (6th-12th grade) will demonstrate how educators can use biomimicry as a framework to engage students in standards-aligned core content while enhancing 21st century skills and empowering our next generation of problem-solvers to think differently about nature, engineering, and the future.

The training is offered as part of the Biomimicry Youth Design Challenge (YDC), a FREE project-based learning program and design competition hosted annually by the Biomimicry Institute. (Learn more at youthchallenge.biomimicry.org)

DATE AND TIME:

Tue, July 9, 2019 from 11:00 AM – 4:30 PM

LOCATION:

Washington Street Community Center
809 South Washington Street, Denver, CO
